Regional data centers with international reach

Our data centers are spread across the Netherlands, Germany and Switzerland. We are located in the center of one of the most important digital hubs in Europe: the metropolitan region of Amsterdam, as well as in the heart of Bavaria in Germany and with Biel and Basel in the economically strong regions of Switzerland. We are convinced that a platform of regional data centers with a wide geographic reach allows our customers to optimize their redundant infrastructure and for them to benefit from regional ecosystems.

Digital business. Personal connections.

At NorthC, we believe that even in today's digital world, people remain the most important factor. That's why we consider excellent service and personalized care paramount. This is also the reason we choose regional locations for our data centers, aiming to be as close as possible to our customers. Additionally, our dedicated team proactively monitors the quality of the data center environments 24/7. If you have any questions, our support team is always here to assist you.
